Full Interior Design is a service that offers in depth interior design solution for your home. We start by understanding your unique style and preferences, before moving to the initial concept stage where we discuss layout configurations and finishes, and then the final stage “design” where we present our online design boards, floorplans, 3D renders, technical drawings for cabinetry, and samples of the finishing materials, and clickable shopping lists. Our goal is to transform your space into a personalised haven that reflects your individuality and enhances your lifestyle.

01 Starting the Design Process

Before we can start designing, you need to submit your design brief. This will provide us with all the information we need about the room/s you'd like to transform, your preferred design style, and the budget you'd like to stick to.

02 Inspiration

Sometimes it's easier to show your true style with pictures. We will create Vision boards tailored to you which we will share with you showing different design styles for you to comment and tell us which ones represent your style and personality.

03 Consultation

After submitting your Design Brief and Vision Boards comments, its now time to schedule a virtual consultation with Natalie & Jenna at a suitable time for you where we can chat through your answers and comments and get the Intial Concepts process rolling.

04 Initial Concept Presentation

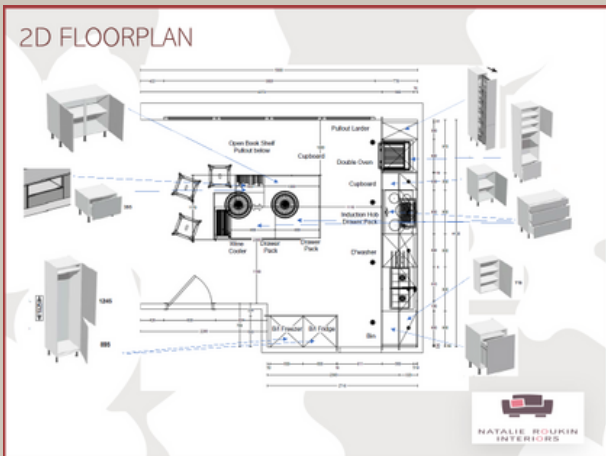

Our "Initial Concept Stage" is tailored around proposing the optimum layout configurations for each room, along with a finishes & colour concept. Once complete, its time to schedule a Face-to-Face meeting so we can gain your feedback on these options and move into the Design Concepts stage.

05 Final Design Presentation

Then we start the really exciting part - your "Final Designs". Once complete, these will be sent to you in advance of your final home design meeting where we will go through your Designs in detail, answer any questions or queries, and leave you feeling super exciting to start your renovation journey!
